

MAXWIN LOW ZHEN ONN

Kuala Lumpur, Malaysia | maxwin140@gmail.com | 012-9661126 | github.com/Maxwin14
Internship availability: 27 July 2026 - 18 October 2026

PROFESSIONAL SUMMARY

Computer Science (Software Engineering) student with hands-on experience building secure full-stack applications using Java, Spring Boot, React, MySQL, and REST APIs. Experienced with JWT authentication, BCrypt password hashing, debugging, Git collaboration, and scheduled workflows. Seeking internship opportunities across software engineering, web development, QA/testing, automation, IT support, and technical support.

TECHNICAL SKILLS

Programming: Java, SQL, HTML, CSS, JavaScript, C++, C#

Frameworks / Platforms: Spring Boot, Spring Security, React, MySQL, Maven

Tools: Git, GitHub, VS Code, DBeaver, Netlify

Concepts: REST APIs, JWT authentication, BCrypt, CRUD, object-oriented programming, debugging, basic QA/testing, scheduled workflows, environment configuration

EDUCATION

Multimedia University, Cyberjaya | Bachelor of Computer Science (Software Engineering)

Expected August 2027 | CGPA: 3.27

Sunway College | Foundation in Science and Technology

2022-2023 | Sunway Special Merit Scholarship

PROJECTS

BankApp Secure | Flagship Full-Stack Project

Java 17, Spring Boot, Spring Security, React, MySQL, JWT, Maven

- Built a banking simulation covering registration, secure login, account management, fund transfers, transaction history, and scheduled payments.
- Implemented JWT authentication, BCrypt password hashing, and ownership checks for account and transfer operations.
- Connected a React dashboard to Spring Boot REST APIs and MySQL persistence.

Campus Security & Emergency Management System | Five-Person University Team Project

Role: Student Module Lead | React, Spring Boot, MySQL, Git, GitHub

- Coordinated module work and integration within a five-person student development team.
- Contributed architecture and use-case design for Student, Staff, Security Officer, and Security Admin roles.
- Reviewed pull requests and used shared Git version control to support team integration.

Ford Malaysia Lead Generation Landing Page | Personal Frontend Project

Role: Landing page and enquiry flow | HTML, CSS, JavaScript, Netlify

- Developed a responsive Ford Ranger buyer landing page with variant guidance, FAQ content, and new/used enquiry paths.
- Implemented a client-side instalment estimator and direct WhatsApp enquiry flows; deployed the live site on Netlify.

WORK EXPERIENCE

Grab | Driver-Partner | 2023-Present

- Balance university studies with independent, customer-facing work requiring communication and practical problem-solving.
- Follow professional driving, safety, and service requirements while managing flexible operations.
